

EternaBond® stays stuck, even in the Heat of Arizona, or the Cold of Alaska . . . down to -70°F!

EternaBond® is a perfect solution for large, commercial repairs or quick & easy emergency repairs!

ETERNA SEAL™

An exceptional long lasting one-part elastomeric sealant that provides superior adhesion to a wide variety of surfaces. Fast dry with quick tack free time, permanently resilient, resists vibration and temperature cycling. Outstanding resistance to water, most industrial chemicals, acids/bases. Highly weather and UV resistant. No priming necessary, paintable, can be finger tooled.

SEALS

- Roof Joints (seams)
- Flashings
- Copings
- Skylights
- Gutters

BONDS

- EPDM
- TPO
- Fiberglass
- Metals, including galvanized
- Glass

And more: Wood, particleboard, plywood, brick, concrete
Available in clear, black, white and gray.

ULTIMATE ALL PURPOSE ULTIMATE ROOF REPAIR KIT

Enhanced waterproofing and roof repair kit for the professional. Everything contained in a wide-opening shoulder tool bag.

Kit Includes:

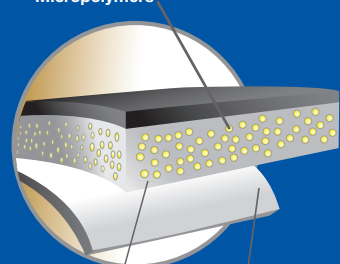

- 4" x 25' RoofSeal™ White
- 2" x 50' DoubleStick™
- 4" x 25' RoofSeal™ Black
- 14oz Spray EternaPrime®
- 14oz Spray EternaClean™
- HD 2.5"x2# Roller
- Cutting Tool
- Scoring Pad
- Seam Probe

TECHNOLOGY**

 **H.B. Fuller**

RoofSeal™

For use on virtually all roofs, RoofSeal™ tape incorporates EternaBond®'s advanced MicroSealant® Technology and features a super flexible UV stable backing. Available in White, Black, Tan and Gray. RoofSeal™ is a one-step (with the exception of cleaning the surface), semi-permanent repair system for all roofs including EPDM, TPO, Hypalon and all roof accessories. RoofSeal™ creates a waterproof, moisture and air tight barrier.

RoofSeal PLUS®

RoofSeal PLUS®, almost twice as thick as regular RoofSeal™ with 30 additional mils of EternaBond® MicroSealant®! RoofSeal PLUS® is specifically designed for granulated roofs or surfaces that require a deeper seal.

DOUBLESTICK™

For use between two surfaces, DoubleStick™ tape is a thick, 60 mil double-sided tape incorporating EternaBond®'s advanced MicroSealant® Technology. DoubleStick™ creates a tight, permanently flexible, waterproof seal between 2 surfaces.

DoubleStick™ tape can be twisted into a rope and used to fill gaps and voids in wall penetrations. Great for pest control!

WEBSEAL®

WebSeal® tape is a woven, reinforced fabric, coated with EternaBond®'s advanced MicroSealant®. WebSeal® is designed to hold virtually all roof coatings whether water based or solvent based. WebSeal® is a faster way to seal roofs prior to application of roof coatings. WebSeal®'s "no memory" construction allows it to conform to many irregular surfaces like screw heads, standing seams, gutters and more.

ALUMIBOND™

For use on roofs, walls, ductwork, floors, gravity tanks, troughs, etc... Heavy duty 4 mil aluminum backing for applications that need extra strength. UV stable and moisture tight. The aluminum backing, combined with a layer of EternaBond®'s advanced MicroSealant®, creates an extremely durable surface.

COPPERFLASH™

Ideal for copper gutters, valley repair and restoration. For use on virtually all roofs, cupolas, floors, etc... UV stable and moisture tight, CopperFlash™ tape provides an air and vapor barrier. The 1 oz copper combined with a thinner layer of EternaBond® MicroSealant® adhesive creates an extremely hard surface. CopperFlash™ will patina over time to match aged copper.

ETERNAPRIME™

EternaPrime™ is a specially formulated primer developed specifically for EternaBond® tapes.

EternaPrime™ is used to simplify installation and creates a stable surface when:

- Installing EternaBond® tapes in low ambient temperatures from +40°F down to -20°F.
 - As a coalescing agent on surfaces with difficult to remove dirt or rust.
 - Applying EternaBond® tapes to porous surfaces.
 - Conditions which may encapsulate the EternaBond® tape, such as mortar joints.
- CAUTION: do not use on PVC.

ETERNACLEAN™

EternaClean™ is a spray cleaner for all single-ply roof surfaces. EternaClean™ is formulated with a proprietary mixture of hot solvents, designed to "open" single-ply roof membranes and metals. It allows the surface to release contaminants like oxidation, grime, oil & grease, tree sap, etc. EternaClean™ leaves no residue, dries fast, and is non-chlorinated so it is environmentally friendly. EternaClean™ prepares surfaces for the application of EternaBond® MicroSealant® tapes as well as other sealants.
