ACCULYNX

Simple Business Management Software That Helps You Grow

"AccuLynx has taken us to new heights. Every member of our team can use it easily, which makes running the business very simple." *- Jeremy Gilstrap, Owner | Dreamworks Restoration Contractors*

Designed for Roofing

AccuLynx was created specifically for the roofing industry, so it meets contractors' needs without requiring customization or changes to processes. AccuLynx integrates seamlessly into a roofing company's existing workflow, streamlining every aspect of the business and helping you grow.

Easy to Use

Anyone can learn how to use AccuLynx —even contractors who are new to software. No technical expertise is required to take advantage of the entire system right away. Every staff member—regardless of their level—can incorporate AccuLynx into their process and start seeing the benefits immediately.

Simple Onboarding

Our personalized onboarding program gets roofing contractors up and running on the system quickly. New customers are guided through the straightforward setup and trained on the full suite of features in as little as a day. Right from the start, you'll see how easy it is to get the most out of AccuLynx.

Support Anytime

When questions arise, AccuLynx users can turn to their dedicated Customer Success team. Every user license includes live help and on-demand training, available via phone, online or in-person. Whether you're a new user or longtime customer, you'll have access to these resources whenever you need them.
